CHOOSE J.N.N

J.N.N is Different

J.N.N Institute of Engineering was founded to not only graduate engineering innovators who will be leaders in solving the pressing global challenges of today and tomorrow but also as a resource to other colleges and universities across the world seeking to broaden and rethink their educational approaches and learning environments. We are fully responsive to the local/ regional needs and aware of our contribution not only to education but to the social and economic development of the region.

People-Inspired

J.N.N Institute of Engineering is one of the first engineering colleges in the state to develop a series of progressive steps - knowing that the true goal of engineering is to make people’s lives better. From improving the life of the elderly in a nearby village to building new technologies, our students connect their engineering education to the reality of making a difference in the world.

Real World

A fundamental part of J.N.N’s philosophy is that learning is taken out of the realm of academic theory and put in the context of real-world applications. Students tackle actual engineering challenges in a manner very similar to the global teams assembled by today's leading companies. This hands-on approach enables them to learn the reality of what it’s like to work within financial or other resource constraints, and how innovative thinking is required to solve real-world problems.

Innovation

Our innovative educational approach is aimed at changing how students learn engineering; if something doesn’t work, students and faculty revise the model until it does. Students are encouraged to take risks, make mistakes, learn from those mistakes, persevere, and succeed in applying new concepts. J.N.N’s extraordinary faculty share a devotion to continued experimentation in and improvement of engineering education.

Impact

J.N.N is making a large difference—on both a local and national scale. We are attracting top faculty and students. Our student body is gender balanced and has one of the highest graduation rates in the state. Students are entering the country’s top graduate schools, being offered generous scholarships, are actively pursued by employers, or starting their own businesses right out of college. Not only are we graduating innovators, but we are also focused on helping to transform engineering education.

Collaborate

J.N.N is committed to collaborating with others to make the changes necessary to attract, retain and graduate engineers with the right mind and skill set. J.N.N’s Industry Institute Partnership Cell was founded to co-design educational transformation between the Industry and Institution. The effort is taking hold, and hundreds are visiting J.N.N, attending workshops, seeking immersive experiences and intensely working to bring about innovation in their learning environments.

PLACEMENTS

The right qualification is a great stepping stone to landing one's dream job. In addition, it is of paramount importance to be well prepared and poised for an interview at the right time to effortlessly transform your dream of an ideal job into a reality. We at J.N.N, are pioneers in mentoring students from all disciplines to approach the interview process in a self-assured, confident manner that guarantees placement. Some of the skills we impart to our students are,

- Communication Skills
- Resume Preparation
- Personality Development
- Group Discussion
- Mock Interviews
- Aptitude Test

J.N.N's placement training program offers our students targeted, competitive techniques that help students to excel in interviews. The program fosters building self-esteem, communication and interpersonal skills, practice core values that equip them to compete with the best out there.

ACADEMY PARTNERSHIPS

J.N.N has signed MOU’s (Memorandum of Understanding) with the following universities,

核电: Northern Illinois University, U.S.A
核电: St. Clair College, Canada
核电: Kangwon National University, South Korea

This international collaboration will provide engineering students of J.N.N and these universities with global and cross-cultural engineering education experience. This tie-up paves the way for both the institutions to do the following

核电: Student Exchange program
核电: Knowledge Transfer program
核电: Students can work on projects with the help and guidance of faculties from J.N.N & these universities.

CHOOSE J.N.N
INDUSTRY PARTNERSHIPS

Through the Industry Institute Partnership Cell, J.N.N Institute of Engineering has signed a number of Memorandum of Understanding (MOU) with various foreign and local industries and organizations for technical collaboration, industry projects and consultancy.

核电: BOC India Ltd., Germany
核电: Grupo Antolin (P) Ltd., Spain

ADVANTAGES

- Business English Certificate (BEC) from Cambridge English
- 12 Value added courses to equip students to meet the needs of the industry
- Rigorous placement training from 2nd year onwards
- J.N.N Graduate Internship Program - Tie ups with leading industries for internships
- 8 Centre’s of Excellence in partnership with Microsoft, EMC Corporation, Vmware, Autodesk, Dassault Systems & PTC, U.S.A.
- Free Microsoft Office 365 account for every student
- Study abroad options at our partner universities in U.S.A & Canada
- Located just 25 kilometres from Chennai
